### ABSTRACT

Sociology is usually represented as having emerged alongside European modernity. The latter is frequently understood as sociology's special object with sociology itself a distinctively modern form of explanation. The period of sociology's disciplinary formation was also the heyday of European colonialism, yet the colonial relationship did not figure in the development of sociological understandings. While the recent emergence of postcolonialism appears to have initiated a reconsideration of understandings of modernity, with the development of theories of multiple modernities, I suggest that this engagement is more an attempt at recuperating the transformative aspect of postcolonialism than engaging with its critiques. In setting out the challenge of postcolonialism to dominant sociological accounts, I also address 'missing feminist/queer revolutions', suggesting that by engaging with postcolonialism there is the potential to transform sociological understandings by opening up a dialogue beyond the simple pluralism of identity claims.

### KEY WORDS

feminism / identity / modernity / multiple modernities / postcolonialism / sociological theory

The 'modern' idea of the social, as a number of commentators have argued, was delineated in the emergence of sociology itself and in relation to the combined upheavals of the political and industrial revolutions of the 19th century (Giddens, 1987; Hawthorn, 1976; Heilbrun, 1995; Nisbet, 1966). The new social theory that emerged was seen to correspond to these new social relations and the problems they brought forth. Modernity was framed as 'the one great
